\*This verification form is valid for up to five (5) years provided no material changes have been made to the structure. OIR-B1-I802 (Rev. 01/12) Adopted by Rule 69O-170.0155 Page 1 of 4

182 psf.	
D. Reinforced Concrete Roof Deck.	
E. Other:	
F. Unknown or unidentified.	
G. No attic access.	
4. Roof to Wall Attachment: What is the WEAKEST roof to wall connection? (Do not include attachment of hip/valley jacks w	ithin
5 feet of the inside or outside corner of the roof in determination of WEAKEST type)	
A. Toe Nails	
Truss/rafter anchored to top plate of wall using nails driven at an angle through the truss/rafter and attach the top plate of the wall, or	ed to
Metal connectors that do not meet the minimal conditions or requirements of B, C, or D	
Minimal conditions to qualify for categories B, C, or D. All visible metal connectors are:	
R Secured to truss/rafter with a minimum of three (3) nails, and	
R Attached to the wall top plate of the wall framing, or embedded in the bond beam, with less than a ½" gap frequency the blocking or truss/rafter and blocked no more than 1.5" of the truss/rafter, and free of visible severe corrosion.	om
B. Clips	
Metal connectors that do not wrap over the top of the truss/rafter, or	
Metal connectors with a minimum of 1 strap that wraps over the top of the truss/rafter and does not meet the position requirements of C or D, but is secured with a minimum of 3 nails.	e nail
R C. Single Wraps	
Metal connectors consisting of a single strap that wraps over the top of the truss/rafter and is secured w minimum of 2 nails on the front side and a minimum of 1 nail on the opposing side.	/ith a
D. Double Wraps	
Metal Connectors consisting of 2 separate straps that are attached to the wall frame, or embedded in the bond beam, on either side of the truss/rafter where each strap wraps over the top of the truss/rafter and is secured vanimimum of 2 nails on the front side, and a minimum of 1 nail on the opposing side, or	
Metal connectors consisting of a single strap that wraps over the top of the truss/rafter, is secured to the wall both sides, and is secured to the top plate with a minimum of three nails on each side.	on
E. Structural Anchor bolts structurally connected or reinforced concrete roof.	
F. Other:	
G. Unknown or unidentified	
H. No attic access	
5. <b>Roof Geometry:</b> What is the roof shape? (Do not consider roofs of porches or carports that are attached only to the fascia or was	all of
the host structure over unenclosed space in the determination of roof perimeter or roof area for roof geometry classification).	
A. Hip Roof  Hip roof with no other roof shapes greater than 10% of the total roof system perimeter.  Total length of non-hip features: feet; Total roof system perimeter: feet	
B. Flat Roof  Roof on a building with 5 or more units where at least 90% of the main roof area has a roof slope of less than 2:12. Roof area with slope less than 2:12 sq ft; Total roof area sq ft	
R C. Other Roof Any roof that does not qualify as either (A) or (B) above.	
6. Secondary Water Resistance (SWR): (standard underlayments or hot-mopped felts do not qualify as an SWR)	
A. SWR (also called Sealed Roof Deck) Self-adhering polymer modified-bitumen roofing underlayment applied directly to sheathing or foam adhesive SWR barrier (not foamed-on insulation) applied as a supplemental means to protect the dwelling from water intrusion in the event of roof covering loss.	the
B. No SWR.	
R C. Unknown or undetermined.

*This verification form is valid for up to five (5) years provided no material changes have been made to the structure or	
inaccuracies found on the form.  OIR-B1-1802 (Rev. 01/12) Adopted by Rule 69O-170.0155  Page 2 of 4	

or greater resistance than 8d common nails spaced a maximum of 6 inches in the field or has a mean uplift resistance of at least

7. **Opening Protection:** What is the <u>weakest</u> form of wind borne debris protection installed on the structure? **First**, use the table to determine the weakest form of protection for each category of opening. **Second**, (a) check one answer below (A, B, C, N, or X) based upon the lowest protection level for ALL Glazed openings **and** (b) check the protection level for all Non-Glazed openings (.1, .2, or .3) as applicable.

Opening Protection Level Chart		Glazed Openings				Non-Glazed Openings	
openi form (	an "X" in each row to identify all forms of protection in use for each ng type. Check only one answer below (A thru X), based on the weakest of protection (lowest row) for any of the Glazed openings and indicate eakest form of protection (lowest row) for Non-Glazed openings.	Windows or Entry Doors	Garage Doors	Skylights	Glass Block	Entry Doors	Garage Doors
N/A Not Applicable- there are no openings of this type on the structure			Х	Х	Х		X
Α	Verified cyclic pressure & large missile (9-lb for windows doors/4.5 lb for skylights)						
В	Verified cyclic pressure & large missile (4-8 lb for windows doors/2 lb for skylights)						
С	Verified plywood/OSB meeting Table 1609.1.2 of the FBC 2007				ř		
D	Verified Non-Glazed Entry or Garage doors indicating compliance with ASTM E 330, ANSI/DASMA 108, or PA/TAS 202 for wind pressure resistance						
	Opening Protection products that appear to be A or B but are not verified						
N	Other protective coverings that cannot be identified as A, B, or C						
х	No Windborne Debris Protection	Х				Х	

A. Exterior Openings Cyclic Pressure and 9-lb Large Missile (4.5 lb for skylights only) All Glazed openings are protected at a minimum, with impact resistant coverings or products listed as wind borne debris protection devices in the product approval system of the State of Florida or Miami-Dade County and meet the requirements of one of the following for "Cyclic Pressure and Large Missile Impact" (Level A in the table above).

- Miami-Dade County PA 201, 202, and 203
- Florida Building Code Testing Application Standard (TAS) 201, 202, and 203
- American Society for Testing and Materials (ASTM) E 1886 and ASTM E 1996
- Southern Standards Technical Document (SSTD) 12
- For Skylights Only: ASTM E 1886 and ASTM E 1996
- For Garage Doors Only: ANSI/DASMA 115
- A.1 All Non-Glazed openings classified as A in the table above, or no Non-Glazed openings exist
- A.2 One or More Non-Glazed openings classified as Level D in the table above, and no Non-Glazed openings classified as Level B, C, N, or X in the table above
- A.3 One or More Non-Glazed Openings is classified as Level B, C, N, or X in the table above
- **B.** Exterior Opening Protection- Cyclic Pressure and 4 to 8-lb Large Missile (2-4.5 lb for skylights only) All Glazed openings are protected, at a minimum, with impact resistant coverings or products listed as windborne debris protection devices in the product approval system of the State of Florida or Miami-Dade County and meet the requirements of one of the following for "Cyclic Pressure and Large Missile Impact" (Level B in the table above):
  - ASTM E 1886 and ASTM E 1996 (Large Missile 4.5 lb.)
  - SSTD 12 (Large Missile 4 lb. to 8 lb.)
  - For Skylights Only: ASTM E 1886 and ASTM E 1996 (Large Missile 2 to 4.5 lb.)
  - B.1 All Non-Glazed openings classified as A or B in the table above, or no Non-Glazed openings exist
  - B.2 One or More Non-Glazed openings classified as Level D in the table above, and no Non-Glazed openings classified as Level C, N, or X in the table above
  - B.3 One or More Non-Glazed openings is classified as Level C, N, or X in the table above
- C. Exterior Opening Protection- Wood Structural Panels meeting FBC 2007 All Glazed openings are covered with plywood/OSB meeting the requirements of Table 1609.1.2 of the FBC 2007 (Level C in the table above).
  - C.1 All Non-Glazed openings classified as A, B, or C in the table above, or no Non-Glazed openings exist
  - C.2 Onc or Morc Non-Glazed openings classified as Level D in the table above, and no Non-Glazed openings classified as Level N or X in the table above
  - C.3 One or More Non-Glazed openings is classified as Level N or X in the table above

OIR-B1-1802 (Rev. 01/12) Adopted by Rule 69O-170.0155

N. Exterior Opening Protection (unverified shutter systems with no documentation) All Glazed openings are protected with protective coverings not meeting the requirements of Answer "A", "B", or C" or systems that appear to meet Answer "A" or "B" with no documentation of compliance (Level N in the table above).

N.1 All Non-Glazed openings classified as Level A, B, C, or N in the table above, or no Non-Glazed openings exist

N.2 One or More Non-Glazed openings classified as Level D in the table above, and no Non-Glazed openings classified as Level X in the table above

N.3 One or More Non-Glazed openings is classified as Level X in the table above

R X. None or Some Glazed Openings One or more Glazed openings classified and Level X in the table above.

		IONS MUST BE CERTIFIED BY A QUAI Statutes, provides a listing of individuals			
Qualified Inspector Name:	Seth A. Ford	License Type: Certified General Cont	ractor	License or Certificate #: CGC 062495	
Inspection Company:	Seth A. Ford		Phone: 5	61.718.7560	

## Qualified Inspector – I hold an active license as a: (check one)

Home inspector licensed under Section 468.8314, Florida Statutes who has completed the statutory number of hours of hurricane mitigation training approved by the Construction Industry Licensing Board and completion of a proficiency exam.

Building code inspector certified under Section 468.607, Florida Statutes.

R General, building or residential contractor licensed under Section 489.111, Florida Statutes.

Professional engineer licensed under Section 471.015, Florida Statutes.

Professional architect licensed under Section 481.213, Florida Statutes.

Any other individual or entity recognized by the insurer as possessing the necessary qualifications to properly complete a uniform mitigation

verification form pursuant to Section 627.711(2), Florida Statutes.
Individuals other than licensed contractors licensed under Section 489.111, Florida Statutes, or professional engineer licensed under Section 471.015, Florida Statues, must inspect the structures personally and not through employees or other persons. Licensees under s.471.015 or s.489.111 may authorize a direct employee who possesses the requisite skill, knowledge, and experience to conduct a mitigation verification inspection.
I, Seth A. Ford am a qualified inspector and I personally performed the inspection or (licensed (print name)
contractors and professional engineers only) I had my employee (N/A) perform the inspection
(print name of inspector) and I agree to be responsible for his/her work.
Qualified Inspector Signature:
An individual or entity who knowingly or through gross negligence provides a false or fraudulent mitigation verification form is subject to investigation by the Florida Division of Insurance Fraud and may be subject to administrative action by the appropriate licensing agency or to criminal prosecution. (Section 627.711(4)-(7), Florida Statutes) The Qualified Inspector who
certifies this form shall be directly liable for the misconduct of employees as if the authorized mitigation inspector personally performed the inspection.
<u>Homeowner to complete</u> : I certify that the named Qualified Inspector or his or her employee did perform an inspection of the residence identified on this form and that proof of identification was provided to me or my Authorized Representative.
Signature: Date:
An individual or entity who knowingly provides or utters a false or fraudulent mitigation verification form with the intent to obtain or receive a discount on an insurance premium to which the individual or entity is not entitled commits a misdemeanor of the first degree. (Section 627.711(7), Florida Statutes)
The definitions on this form are for inspection purposes only and cannot be used to certify any product or construction feature as offering protection from hurricanes.
